

Expression of Interest EOI 2019-20

Part 1- General Details

| | | | |
|--|--|-----------------------------|-------------------|
| | | EOI ID | EOI - 0215 |
| EOI Title: (max 80 char) | Best practice management for bees in cotton farming system | | |
| Type of Research | Extension | | |
| Proposed Start Date: | 01 July 2019 | Proposed Cease Date: | 30 June 2021 |
| <i>Please refer to CRDC's Strategic R&D Plan 2013-2018 for the following.</i> | | | |
| CRDC Goal | 4. (ES1) Strengthening partnerships and adoption | | |
| CRDC Key Focus Area | 4.2 Best practice (myBMP) | | |
| CRDC Activities | 4.2.1 Best practice is based on science and measured impact | | |
| <i>Please identify the relevant Measure of Success as outlined in the CRDC Strategic R&D Plan.</i> | | | |
| CRDC Measure of Success: | myBMP practice modules reflect latest R&D outcomes | | |
| Rural and R&D Priorities | Adoption of R&D | | |
| Strategic Research Priorities | 3a. Optimise food and fibre production using our land and marine resources | | |
| CRDC NSRP | 1.3.3 - Food - Enhanced production through enhanced biosecurity. | | |
| R&D Manager: | Susan Maas | EOI Due Date: | 12 October 2018 |

Part 2 –Expression of Interest Requirements

| | | | | |
|--|----------------|----------------|----------------|--------------|
| Issue: The cotton growing environment can be high-risk environment for bees. Bees are susceptible to many of the insecticides used on cotton farms. If bees or the hives are contaminated by insecticides, individual bees may be killed, or whole hives can be destroyed or their productivity diminished. The industry has developed best practice information for growers, and information on two-way communication tools for growers and beekeepers. | | | | |
| Outcomes: The industry will have up to date guidelines for management of cotton with consideration to bees. | | | | |
| Project description: This project will review and update industry information on best practice to consideration of bees when growing cotton. It will include a review of practices internationally that enable co-existence of both commodities. This project will not focus on pollination research. | | | | |
| Expected Project and Communication Outputs: myBMP and Cotton Pest Management guide have updated best practice management of cotton with consideration to bees. | | | | |
| Project Investment: | | | | |
| Year | 2019-20 | 2020-21 | 2021-22 | TOTAL |
| Indicative budget (up to) | \$30,000 | \$30,000 | \$0 | \$60,000 |

Part 3 – Selection Criteria

The following selection criteria will be used by the CRDC to assess the full research proposals (FRPs) received for each Expression of Interest.

1. A sound understanding of the nature and importance of the outcome to the Australian cotton industry:

The research applicant must address the Issue, Outcome and Project Description in terms of the CRDC Strategic Plan and demonstrate understanding of the impact on the Australian cotton industry.

2. Soundness and clarity of the proposed R&D methods to address project deliverable outcomes:

The research applicant must describe how the research methodology employed will enable the project outcomes to be delivered.

3. Demonstrated capacity of the nominated researcher/s to provide project coordination, management, monitoring and evaluation for the timely delivery of high quality outputs:

The research applicant must describe the research team's project management skills and experience and may include a recent example of a completed project. They must detail the monitoring and evaluation strategy which should include any steering committees to co-ordinate collaborative research, links with CottonInfo, CGAs, Cotton Australia, etc and any additional reporting outside the 6 monthly Progress Reports.

4. Demonstrated track record, technical knowledge and experience of all key personnel in the research area:

The research applicant must describe the project research team's technical skill and experience relevant to the project and methodologies proposed.

5. A demonstrated capacity to effectively communicate project outcomes to diverse stakeholders within the Australian cotton industry:

The research applicant must describe the communication skills and existing communication channels that the research team use to communicate project outcomes to the Australian cotton industry. The new applicants to the cotton industry should provide an example of industry communication from a recent project.

6. Demonstrated ability of the project team to form productive networks and links to build on national and international research already undertaken in related areas:

The research applicant must describe existing networks that the research team use for collaboration with other researchers and an ability to develop new networks as research knowledge increases.

7. The cost effectiveness of this project including cash and in-kind commitments from the applicants and leverage through domestic or international linkages that are useful if not essential to progress the project:

The research applicant should demonstrate market value and market fairness for the proposed budget and comment on the leverage achieved through collaboration and in-kind support.

8. Project demonstrates collaboration between organisations or research groups:

The research applicant must describe the existing or proposed collaboration with other researchers, research groups or committees and the Australian cotton industry.

For information on how to apply, please refer to: www.crdc.com.au/for-researchers

Please note that while the Cotton Research and Development Corporation (CRDC) has released these expressions of interest, due to ongoing drought conditions and the potential impact on CRDCs forward budget, the Corporation may not be in a position to fully support all of the proposals advertised. CRDC has released the full range of EOIs in an endeavour to remain as flexible and opportunistic as possible. Where CRDC may not be in a position to fully support proposals received, we will work with our valued research partners to identify alternative investment options.
