GUIDELINES FOR APPLICANTS

## CRDC Grassroots Grants: 2019-20 guidelines for applicants

---

### Overview

The Cotton Research and Development Corporation (CRDC) Grassroots Grant program is designed to stimulate grower-led projects that build the capacity of industry members and improve the communities in which they operate.

The purpose of this funding is to help build and enhance skills and knowledge, and encourage sustainable financial, environmental and social growth across the cotton industry.

More specifically the grant program seeks projects that:

1. Increase networking between growers, consultants and researchers
2. Grow the skills and knowledge base of cotton growers and their communities
3. Grow the economic and/or social base of cotton grower groups and their communities
4. Support, upskill and engage with new growers to the industry
5. Strengthen collaboration across communities, across industries and regions
6. Help with ground truthing and testing of research and development findings
7. Help improve the levels of adoption of research and development outcomes
8. Help improve the levels of adoption of *myBMP*.

Projects that involve the broader community (such as partnering with schools etc) and those where growers learn from other growers are encouraged.

Projects providing training workshops for existing staff, where there is a regulatory requirement for this training, may be supported for the running costs of the training (venue, catering etc) but will not receive a subsidy for the training component.

Projects that have a financial (or in-kind) contribution from partners are looked upon favourably.

Since the Grassroots Grants program commenced in 2011, CRDC has invested over \$630,000 in 72 projects across the cotton growing valleys – from weather stations to crop nutrition workshops.

### Eligible applicants

Grassroots Grants funding is available to Cotton Grower Associations (CGAs). Cotton growers are unable to apply as individuals: instead, they are encouraged to discuss their idea with their local CGA.

### Eligible projects

A broad range of projects are encouraged and a list of previously successful projects can be found at the end of this document. This list is intended to provide an indication of the types of projects that are supported. You are encouraged to discuss your potential project with a CRDC R&D Manager prior to submitting your application.

### Funding levels

The maximum level of funding available is \$10,000, however projects that demonstrate collaboration with more than one partner or that cover a wider geographical area may be considered for higher levels of funding.

### GST

The GST on funding applications will be held as follows:

*If your CGA is registered for GST:*

If approved, funding will be provided from CRDC to cover costs but not to cover any GST.

How this works: the CGA pays the full amount on an invoice (including the GST). The CGA then claims the GST amount paid back from the ATO. Funds from CRDC will have covered the balance remaining on the invoice.

*If your CGA is NOT registered for GST:*

If approved, funding will be provided from CRDC for the full invoice value.

How this works: if an invoice is received with a GST amount included in the total, CRDC will have covered the full cost and CRDC will claim the GST amount back from the ATO.

### Timing

Applications for the 2019-20 financial year will be accepted between **1 July and 30 November 2019**. If approved, the projects are expected to be implemented during the second half of the financial year.

During the 2019-20 financial year there is a limited amount of funding available, so applicants are encouraged to apply as early in the funding period as possible. Projects may not be funded if: they do not meet the eligibility criteria; the funds have been exhausted for the year; or at the discretion of CRDC.

### Reporting

Below is a table indicating the standard reporting process:

<i>Action</i>	<i>Timeframe</i>
Submit grant application.	Between 1 July and 30 November 2019
CRDC reviews grant application and notifies applicant if successful.	Within three weeks of submitting the application.
CRDC provides successful applicants with the Grassroots Grant funding agreement. The agreement must be signed and returned to CRDC by the applicant, along with a tax invoice to CRDC for payment #1 (as outlined in contract).	Within three weeks of submitting the application.
Applicant receives funding agreed under payment #1.	Within three weeks of returning the agreement and tax invoice.
Project to be completed.	By 30 June 2020.
Applicant to provide a final report and financial report	On completion of the milestones agreed to in the contract (preferably before 30 June 2020). Please note: if you have any issue in meeting the reporting due date, please contact CRDC to request an extension.
Applicant to issue a final tax invoice to CRDC for the remaining agreed funding (payment #2, as outlined in contract).	On approval of the final report by CRDC.

### Previously funded projects
