

CRDC Artificial Intelligence (AI) Transparency Statement

Last updated: June 2026

Why we use AI

Where it is ethical and appropriate, the Cotton Research and Development Corporation (CRDC) uses AI to support internal processes and administrative efficiency. AI is not used to make decisions, exercise powers or determine outcomes.

How we use AI

CRDC uses internal AI tools that do not share our information with external AI programs. There is no direct public interaction with AI tools used by CRDC. CRDC staff can use web browsing tools to conduct background research activities.

Human oversight and safeguards

CRDC does not use automated decision making. All AI outputs are subject to human review.

Monitoring and risk management

CRDC's AI use is low-risk. AI use is monitored through executive oversight. ICT control systems capture and report AI use activities within CRDCs systems.

Governance and accountability

Our use of AI aligns with the [Policy for the Responsible Use of AI in Government](#). Our Executive Director is the Accountable Official for AI.
